

Ввод текста с клавиатуры

```
package myinput;

import java.util.Scanner;

public class MyInput {

    public static void main(String[] args) {
        Scanner keyboard = new Scanner(System.in);
        int inputNumber = keyboard.nextInt();
        double doubleNumber = keyboard.nextDouble();
        boolean boolNumber = keyboard.nextBoolean();
        String stringLine = keyboard.next();
    }
}
```

Генератор случайных чисел

```
package myrandom;

import java.util.Random;

public class MyRandom {

    public static void main(String[] args) {

        int randomNumber = new Random().nextInt(10)+1;
    }
}
```
